This is NOT a pretty picture!

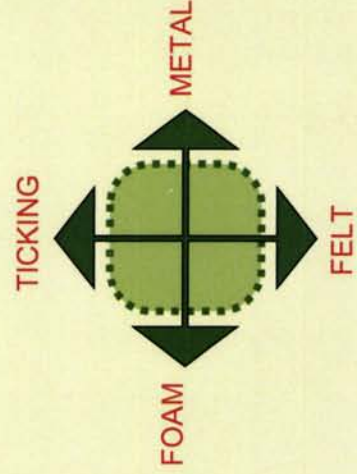

Each trailer load of recycled mattresses is equivalent to two swimming pools of waste that could be diverted from landfills.

WHAT IS IN A MATTRESS?

A mattress is made of metal, wood, cotton batting, fiberfill, urethane foam, and other miscellaneous textiles.

The Typical Mattress:

or more of the following:

YUCK FACTOR

BLOOD	X
URINE	X
GERMS	X
RODENT FECIES	X
BED BUGS	X
FLEAS	X
OTHER BODILY FLUIDS	X

BWARE: Companies that offer to pick up used bedding for free often re-cover them and sell as "refurbished" or "reconditioned"

Over the years we have found some of these mattress to be contaminated with blood, urine, even rodent nests.

We DO NOT RE-COVER! We deconstruct each unit to its core component.

MATTRESS REMOVAL

We have the answer you've been looking for. Let CJP take the hassle out of your mattress disposal.

"We make doing the right thing EASY"

As a recycling professional you understand the importance of providing cost effective alternatives to landfilling. Unfortunately the average consumer does not always have the access to the tools or knowledge necessary to make an informed decision regarding recycling.

CJP Group is pleased to announce our disposal alternative for used mattresses and box springs. Rather than adding to our already overflowing landfills, we deconstruct mattresses to their core components so they can be used again.

Our system reclaims up to 95% of the raw materials, saving valuable natural resources as well as landfill space.

We also offer pick up service for Municipal yards. This is a great way to reduce your bulky waste and provide a true GREEN solution to a difficult waste item.
