# KIDS CAN Compost TOO!

# COMPOSTING IS A GREAT WAY TO

See Below  
for Ways to Compost!

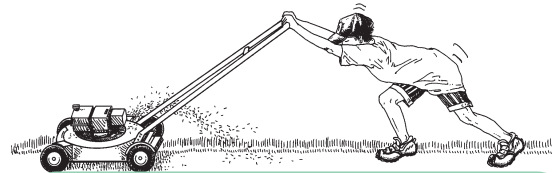

## Why is it Good to Compost?

You can put compost in your garden to help plants grow!

## What is Compost?

Compost looks like soil. If you let vegetables, fruits, leaves, and grass rot in a pile, they will turn into compost.

You can leave grass clippings on the lawn after mowing or put them in the compost bin to help make compost for future use.

It's good for the environment because it cuts down on waste that would normally go to the landfill.

You can fill outdoor bins with yard debris like leaves, grass, and dead plants and don't forget your household organic waste. (see back page to see what organic things you can and can't compost)

## VERMICOMPOSTING

Placing red worms in a bin with damp leaves and shredded newspaper will turn food scraps into soil conditioner!
