

Plastics

Say NO to **Single** Use

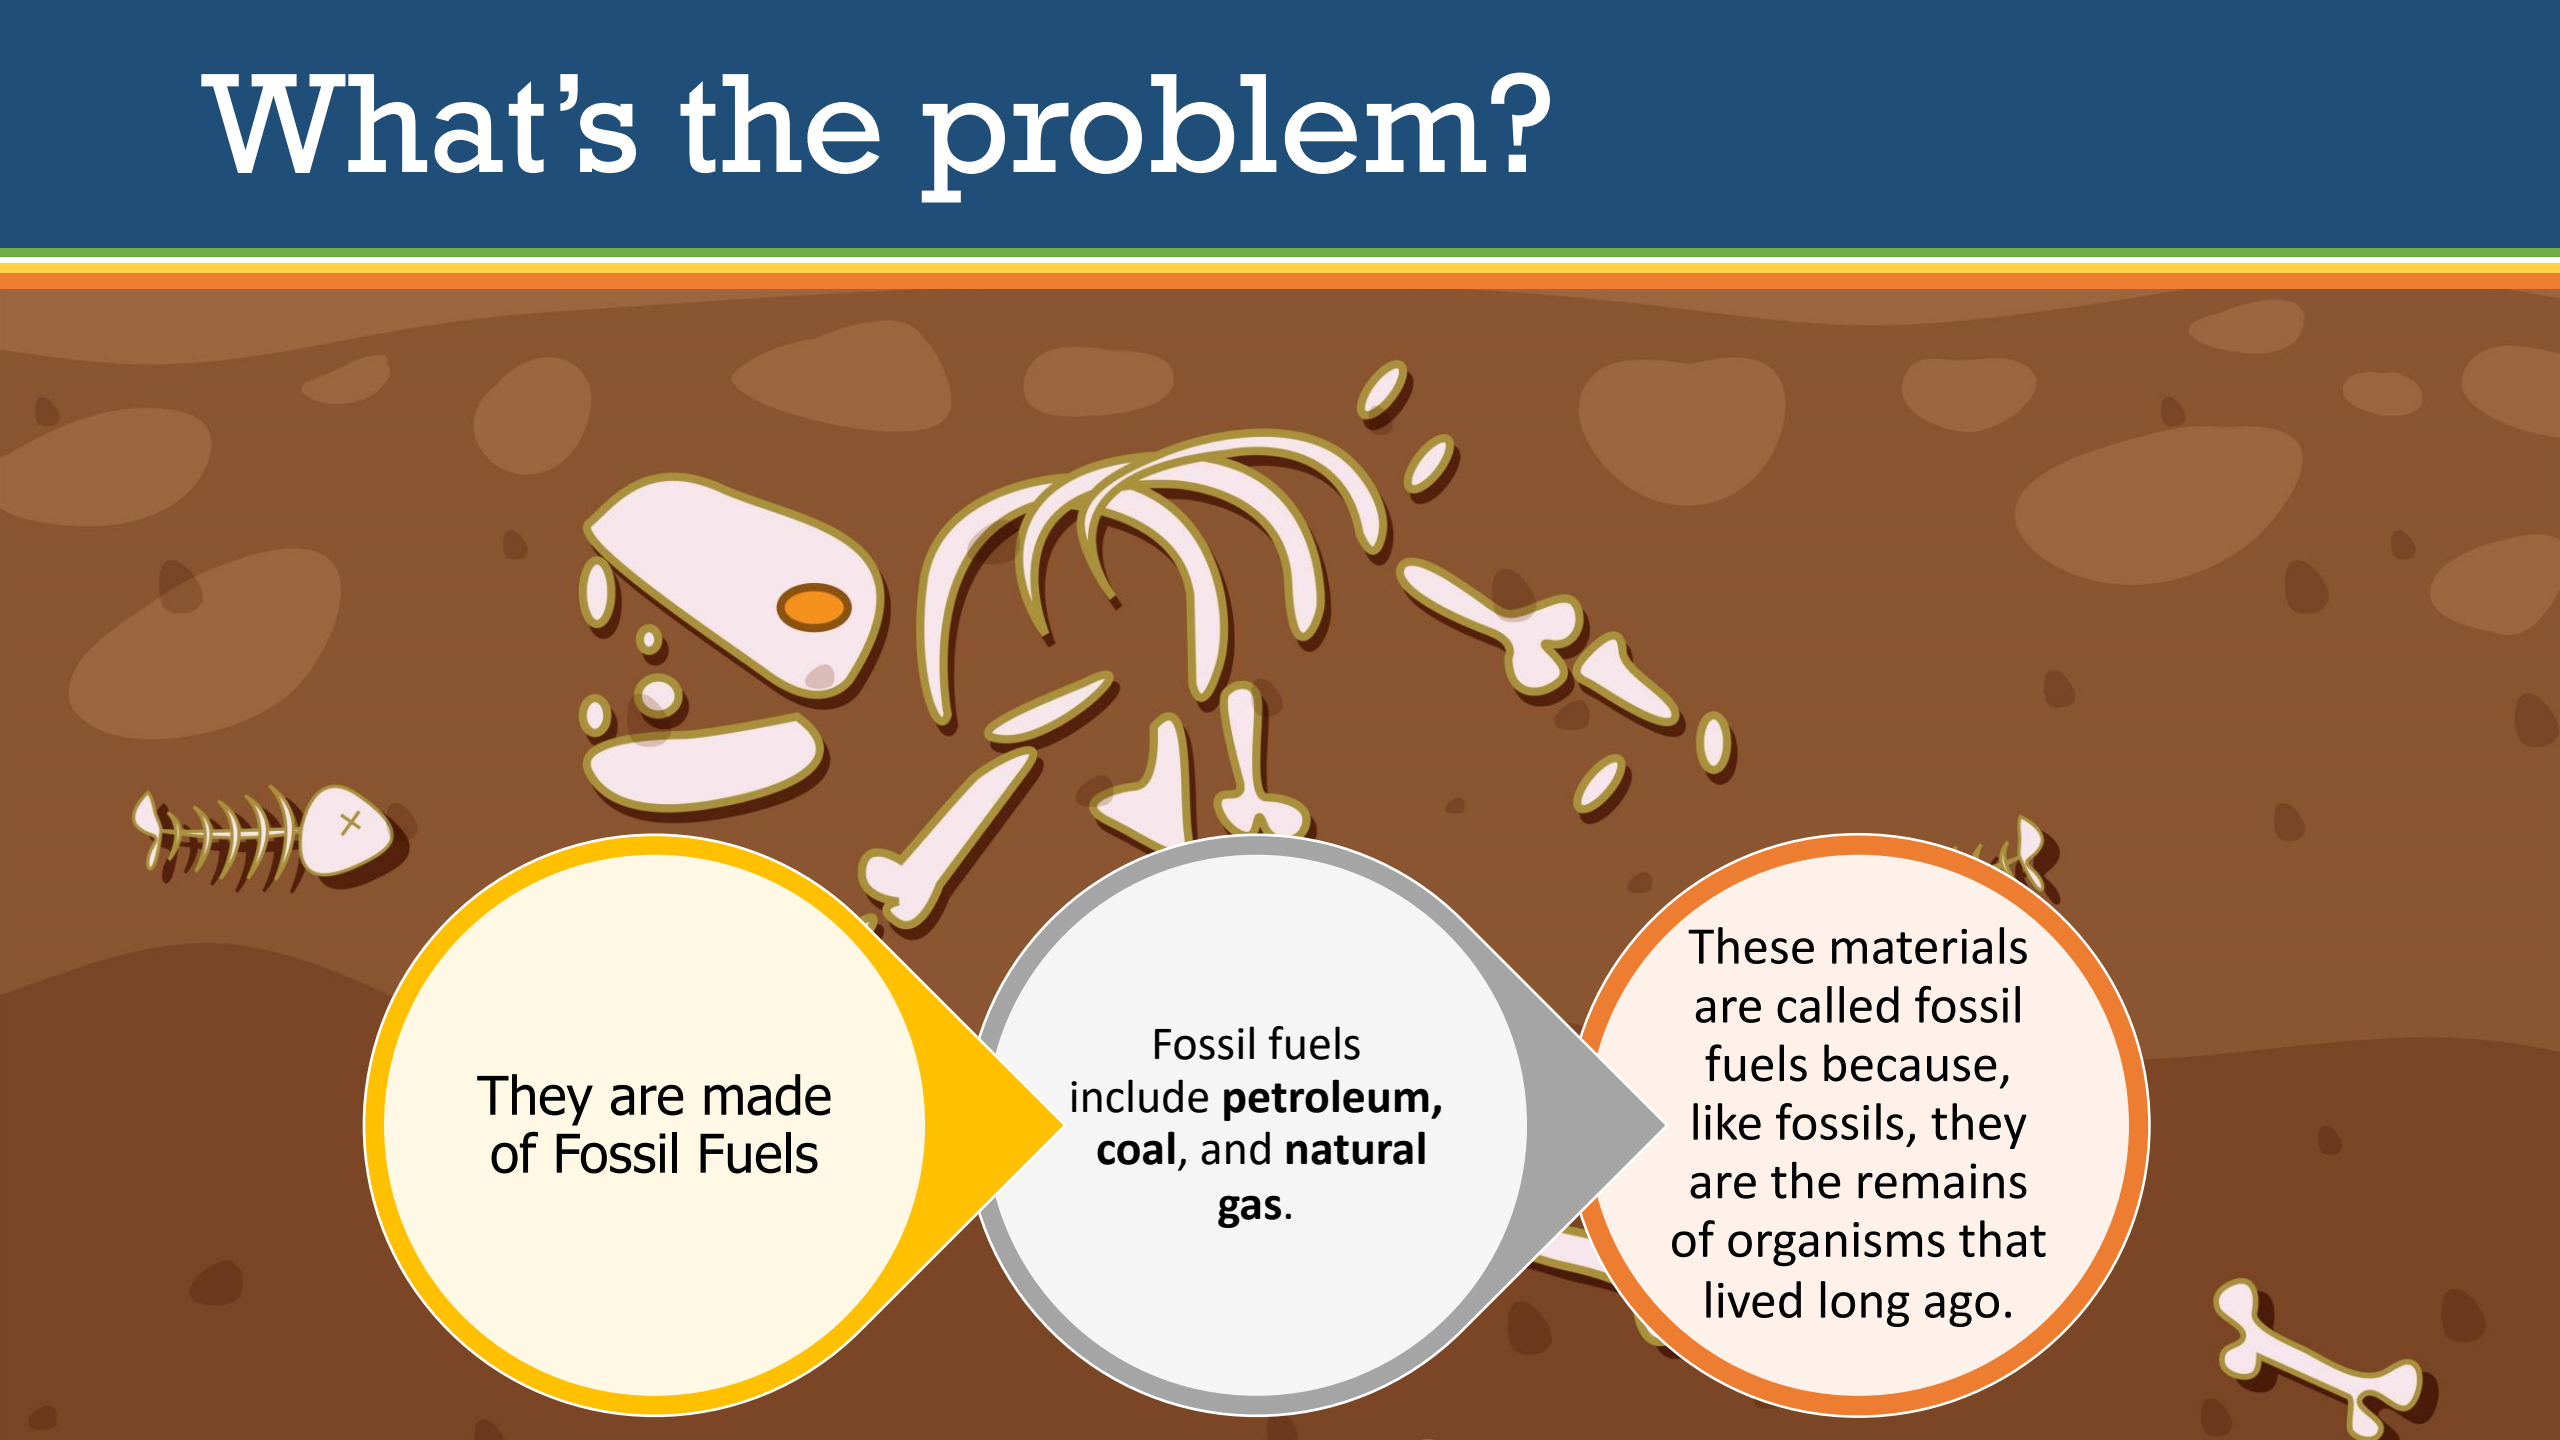

What are single use plastics?

- Objects made of plastic that you only use 1 time

What's the problem?

They are made
of Fossil Fuels

Fossil fuels
include **petroleum**,
coal, and **natural**
gas.

These materials
are called fossil
fuels because,
like fossils, they
are the remains
of organisms that
lived long ago.

Carbon Cycle

Contaminates

Air

Water

Soil

Most are not recyclable

Garbage goes to Landfills

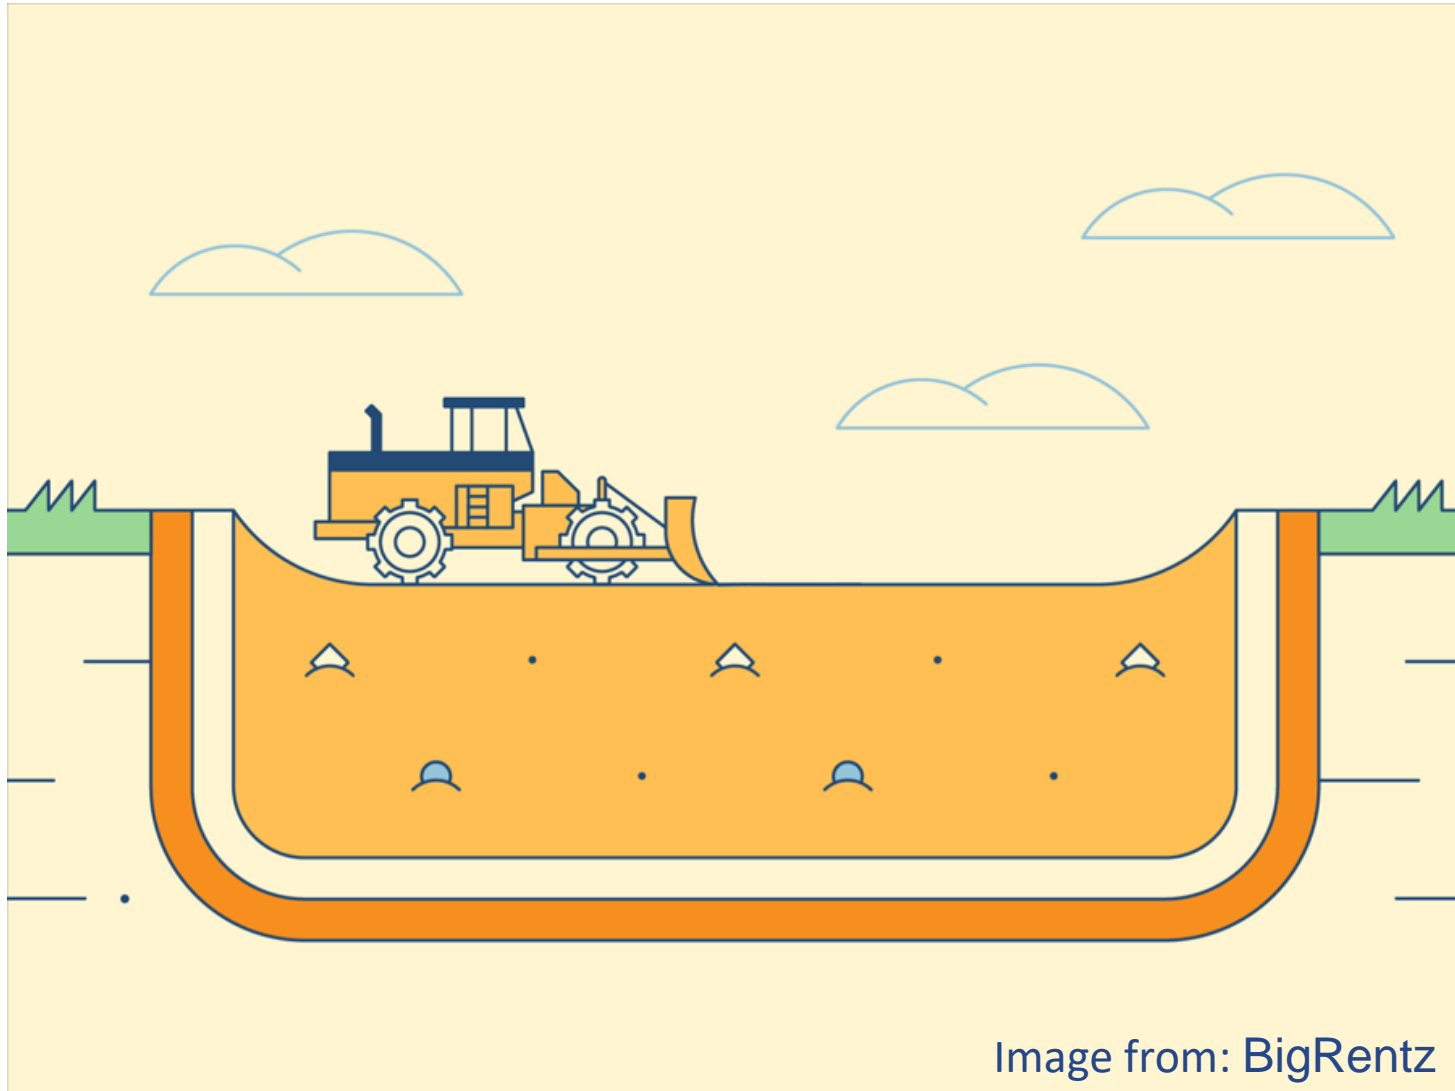

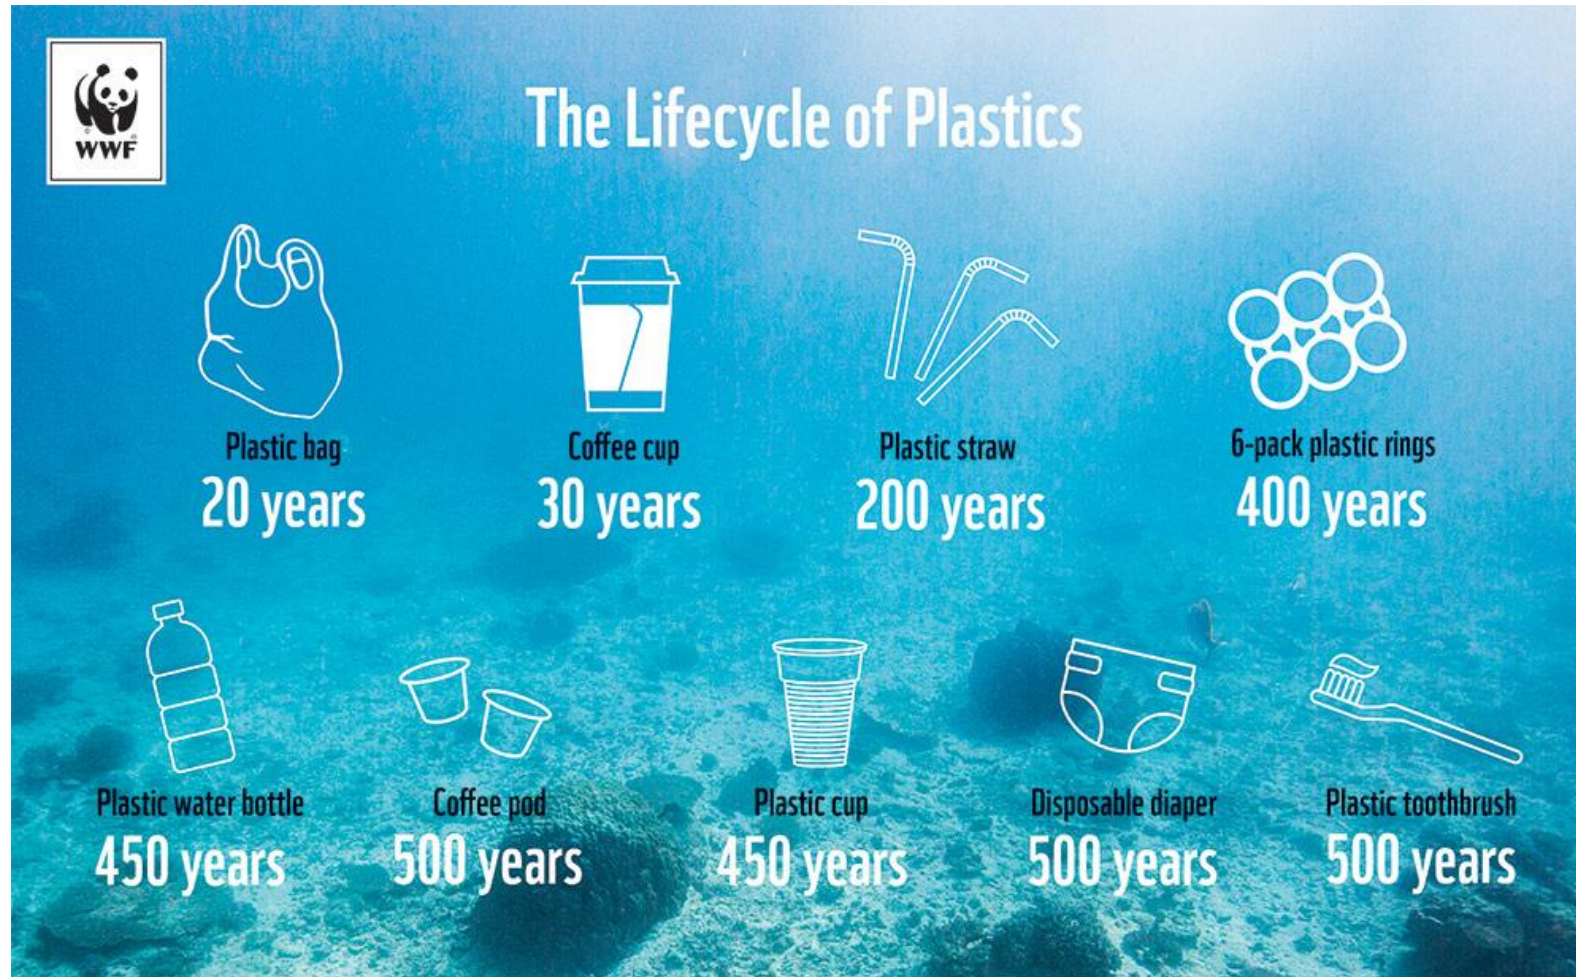

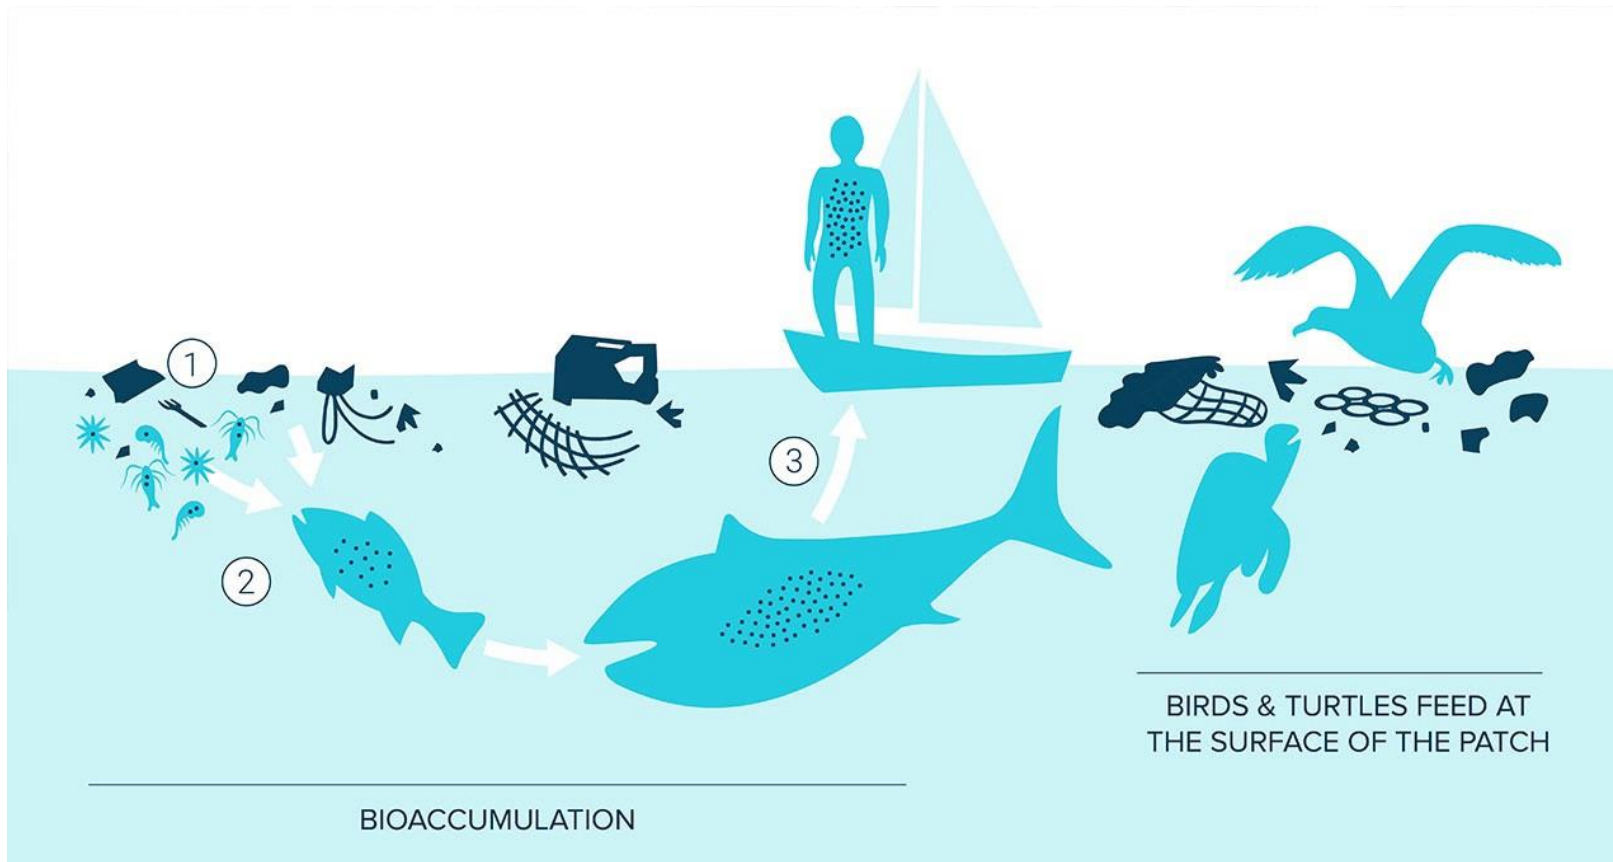

Image from: BigRentz

Some becomes litter and stays around forever 😞

Some break into little pieces
Some get confused for food
Some harm animals
Some come back to us as food

What can we do to stop it?

Say no to single use plastic

Bring your reusable bags

USE YOUR OWN
WATER BOTTLE

Use a reusable water bottle

Keep the planet clean!
