## **RESOLUTION**

**November 6, 2024**

**WHEREAS**, Ocean County acknowledges sea level rise is a potential risk to the coastal zone of New Jersey and its barrier island communities, requiring thoughtful and well-reasoned response from all levels of government; and

**WHEREAS**, Ocean County continues to respond to the threat of tidal flooding/major coastal storms by practicing the highest standards of coastal storms by practicing the highest standards of coastal resiliency and floodplain management in all County critical infrastructure and building projects, while also providing necessary support to our local communities in the approach, duration, and wake of major coastal storms through our County Office of Emergency Management and Public Safety Departments; and

**WHEREAS**, in addition to the County's previously mentioned efforts, all of the municipalities in Ocean County that contain Special Flood Hazard Areas (SFHAs) have adopted floodplain management ordinances in accordance with NJDEP requirements that go beyond compliance with FEMA's standards; have designated floodplain managers; and participate in the National Flood Insurance Program's (NFIP), Community Rating System (CRS) Program, all taking flood mitigation actions that exceed minimum national flood hazard mitigation standards; and

**WHEREAS**, initiated through Governor Murphy's Executive Order 100, the New Jersey Department of Environmental Protection (NJDEP) has produced a 1,057-page rule proposal policy document known as NJ PACT (Protection Against Climate Threats)/REAL (Resilient Environments and Landscape) to expand flood hazard areas (FHAs) statewide and implement higher floodplain management regulatory standards beyond the local and existing FEMA standards; and

**WHEREAS**, according to the NJDEP's website, these rules will soon be posted on the NJ Register for a 90-day public comment period, with a benchmark adoption range of February 2025; and

**WHEREAS**, historically, new rules issued by the NJDEP have primarily been promulgated pursuant to legislation through the typical legislative process; and

**WHEREAS**, in this case, like the NJDEP's recently proposed Resilient Environments and Landscapes (REAL) rules that recommend changes to multiple existing regulatory rules, including the Coastal Zone Management Rules, there is no legislation that authorizes the NJDEP to require more stringent requirements than the federal regulations presently in place; and

WHEREAS, these rules as currently written do not consider the economic impact these new standards may have on the ratables, real-estate values, development and redevelopment statewide, including tourism and local economies, but especially in Ocean County; and

WHEREAS, The State of New Jersey must consider the burden these new rules will have on coastal municipalities, especially within their local construction offices, due to the additional duties and responsibilities of enforcing these higher regulatory standards that will likely result in the need to hire additional staff or enter additional public/private contracts; and

WHEREAS, these proposed rules will also increase construction costs and impact the feasibility for public infrastructure projects with the minimum construction height requirements for new roads in excess of Base Flood Elevation (BFE) plus 5 feet, and will be infeasible and unachievable and

WHEREAS, despite the burden these rules will inevitably have on our coastal towns the State of New Jersey has not approved a budget appropriation to assist coastal towns statewide with the additional duties and functions imposed through the proposed NJPACT/REAL rules; and

WHEREAS, the proposed expansion of flood hazard areas will also create additional financial burdens for property owners living in Ocean County by imposing more restrictive building standards accompanied by engineering assessments and alternatives analyses within newly expanded regulated areas, and may also potentially result in higher insurance premiums given the expansion of the inundation risk zone and increase of the regulated flood hazard area limits by five (5) feet vertically; and

WHEREAS, the proposed NJPACT/REAL policy document is based on Rutgers University's 1029 Study Report entitled, "New Jersey Rising Seas and Changing Coastal Storms," projecting sea level rise for the year 2100 exceeding 5.1 feet, which only has a probability of occurrence of approximately 17%; and

WHEREAS, proposed NJPACT/REAL rules constitute a real threat of pushing fixed income residents out of their homes based on the 17% probability of an 80-year sea level rise projection; and

WHEREAS, the NJDEP's proposed expansion of flood hazard areas limits the County's potential capacity of development and even prohibits development in most coastal areas, especially as inland development centers are being reduced in size via the State Planning process; and

WHEREAS, the Federal Emergency Management Agency (FEMA) is also in the process of preparing detailed updates to the flood insurance rate maps (FIRMS) that take into account many factors of risk including sea level rise; and

WHEREAS, the State of New Jersey has historically used these maps to guide public policy, and therefore, Ocean County urges the State to defer to the superseding governing body, in this instance FEMA; and

WHEREAS, it is imperative that the State of New Jersey consider the disproportionate burden resulting from the implementation of such stringent regulatory standards that will challenge the people of New Jersey living, working and visiting the coastal zones.

NOW, THEREFORE, BE IT RESOLVED that the Ocean County Board of County Commissioners authorizes the following:

1. Ocean County requests that the proposed New Jersey Protecting Against Climate Threat (PACT)/Resilient Environments and Landscape (REAL) Rules not be adopted.
2. Ocean County requests that the State of New Jersey engage the Legislature and enact rules impacting the coastal zone through the typical legislative process, in order to give the people of New Jersey a voice, rather than through an Executive Order with limited public engagement.
3. Ocean County requests comprehensive and independent analysis of potential economic impacts of the proposed regulations.
4. Ocean County requests public engagement sessions allowing stakeholders an opportunity to understand how the new regulations will impact their properties and communities.

BE IT FURTHER RESOLVED that the Clerk forward a certified true copy of this resolution to Governor Phil Murphy; Lieutenant Governor Tahesha Way; Chief of Staff to Governor Murphy, Tim Hillman; Senate President Nicholas P. Scutari; Assembly Speaker Craig J. Coughlin; Senate Environment Committee Chair James J. Kennedy; the New Jersey State Legislature; the New Jersey Association of Counties (NJAC); New Jersey Business and Industry Association (NJBIA); the members of the Ocean County Legislative Delegation; New Jersey League of Municipalities; all County Board of County Commissioners and the Mayor and Council of all towns within the County of Ocean to convey Ocean County's concerns and recommendation.
